

PROJECT ANTARA

Sponsorship & Partnership Overview

A Student-Built 3U CubeSat Mission • BITS Pilani, K.K. Birla Goa Campus

MISSION BRIEF

Project Antara is engineered to study the **South Atlantic Anomaly (SAA)**—a critical weak point in the Van Allen radiation belts posing a daily hazard to low Earth orbit satellites by causing electronic malfunctions, data corruption, and hardware degradation. Antara will capture real-time proton flux measurements to compare with standard industry models (AP8/AP9), generating scientific data that helps future space missions survive this environment.

3U / ≤ 4 kg

FORM FACTOR

400–600 km

TARGET ALTITUDE

5–100 MeV

PROTON ENERGY

1.82 Yrs

MISSION LIFETIME

WHY PARTNER WITH ANTARA?

- **Orbital Brand Presence:** High-visibility logo placement laser-engraved on the satellite structure, printed on PCBs, or etched onto a flight silicon wafer.
- **Elite Talent Pipeline:** Direct recruitment access to a highly capable, hands-on undergraduate aerospace engineering team.
- **"Flight-Proven" Validation:** Hardware/software vendors secure critical space-flight heritage under active LEO conditions.
- **Global & Campus Visibility:** Brand recognition across the mission website, ground station, publications, and BITS tech fest, Quark.

SPONSORSHIP TIERS

1. Principal Mission Partner

₹25,00,000 – ₹50,00,000

- Comprehensive corporate co-branding across all official mission assets.
- Logo laser-engraved on external 3U CubeSat structure.
- Branding on internal OBC/EPS electronic flight boards.
- Lifetime recognition as a founding mission partner.

2. Payload & Subsystem Sponsor

₹10,00,000 – ₹20,00,000

- Direct access to raw telemetry and orbital radiation/imaging data products.
- Exclusive naming rights for a core subsystem (e.g., ADCS, Solar Array).
- Corporate branding at the physical ground-station facility.
- Priority recruitment interview access to the core engineering team.

3. Technical & Hardware Sponsor

₹5,00,000 – ₹10,00,000 (Or In-Kind)

- Official "Flight-Proven" space heritage validation for your components.
- Co-authored engineering case studies and technical publications.
- Branding at design milestones (PDR/CDR) and throughout Quark.

4. BITSian Alumni Legacy (Sparks)

₹1,00,000 – ₹5,00,000

- Name permanently laser-etched onto a flight silicon wafer launched into orbit.
- Permanent listing on the official Project Antara Alumni Wall of Fame.
- Premium framed mission patch and custom 3D desktop CubeSat model.
